Bausatz für Selbstmontage besteht aus 122 Elementen /aus Karton und anderen Materialien/

Assembly Instruction

Pharmacy/Drug Store 0/051/05/K

Model is basing on the real pattern of the building from the small village in northern Germany. The primal building is originating from the beginning of XX century and because of its size is ideally fit as the supplementary motive for small or module layout. It can be assembled completely or changed and matched to individual needs. Creative modelers can, after not much changes of facade or color scheme, with the help of the same model, create the excerpt of the street.

Model was made and completed with help of laser technique, which offers many of new possibilities. The set of the parts to create the model of the house is not difficult, it is Simple necessary to read the instruction, to save the sequence at the time of assembly and to govern yourself by the notices and advices of the producer.

Single parts it is necessary to cut out of the sheet with the help of sharp knife in such a way, so as not to left the expendable connecting parts, which could after hamper the assembly. Al the parts cut it is necessary to double check with respect to number, assign and separate the details, which it necessary to paint separately.

Main Walls, /without the back wall!!!/ and floors, glue and paint with the priming paint, best spaying/.

The roof parts match to the walls glued and next over-glye the single strip of the tile, starting from the Lower part of the roof. Roof is possible to paint by whichever paint imitating the color similar to the real tile. It is possible to employ the different shades from gray, brown up to red, and orange.

Window frames and doors assemble before the painting, taking into account that, that back side of the window possessing the self-adhesive foil, which in greater degree easing the gluing-in the windows without using the glue. Ready window frames paint in white. When the paint will dry up well un-glye the protective coat, which is occurring on the windows, whereupon glue-on to the frame the transparent foil imitatating the window.

Remaining decorative parts, strips with cornices, etc. paint with the other shade/color paint to emphasize them at the elevation. After drying mount-on the parts according to the instruction on the ready and painted building. Readied before windows, shop-windows, and doors glue-in into the building from the back side of the elevation.

The remaining trimming, as for example the division of the accommodations, garnishing the shop-windows, signboards, and artificial lighting carry out by your own discretion.
At the end glue the back wall.

Pharmacy/Drug Store 0/051/05/K

The Pharmacy/Drug Store model is additionally equipped with internal shop-windows, which can be furnished in our extent.

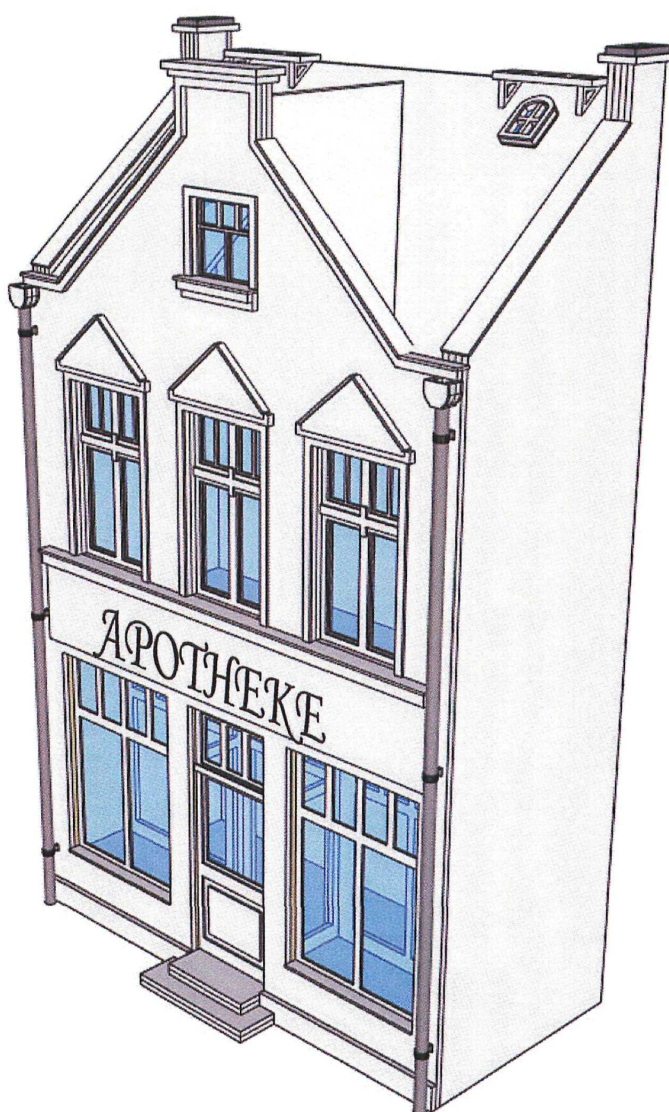

The inscription „Pharmacy/Drug Store” and signboard mount to over shop-windows in the place shown. With the object of other effect, the facade of the building can be sprayed by structural paint with fine pattern. Such porous surface is possible to additionally paint by exact paint, adequately rub and patinate obtaining additional interesting effect.

Remaining external parts Just as the patinating You can Carry out in your own range.

We wish You much pleasant at the time of assembling of this building and we recommend the next models from this series.

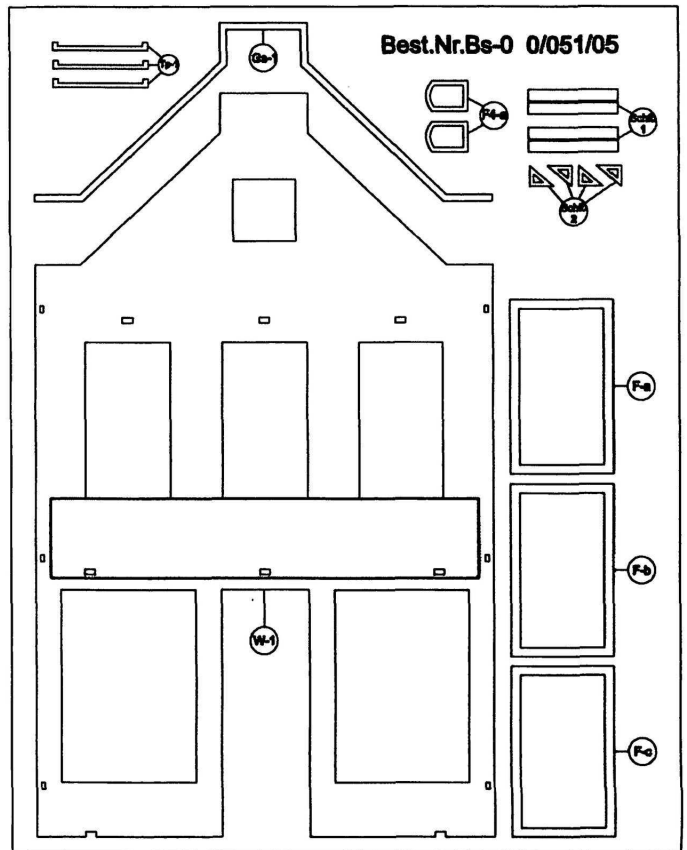

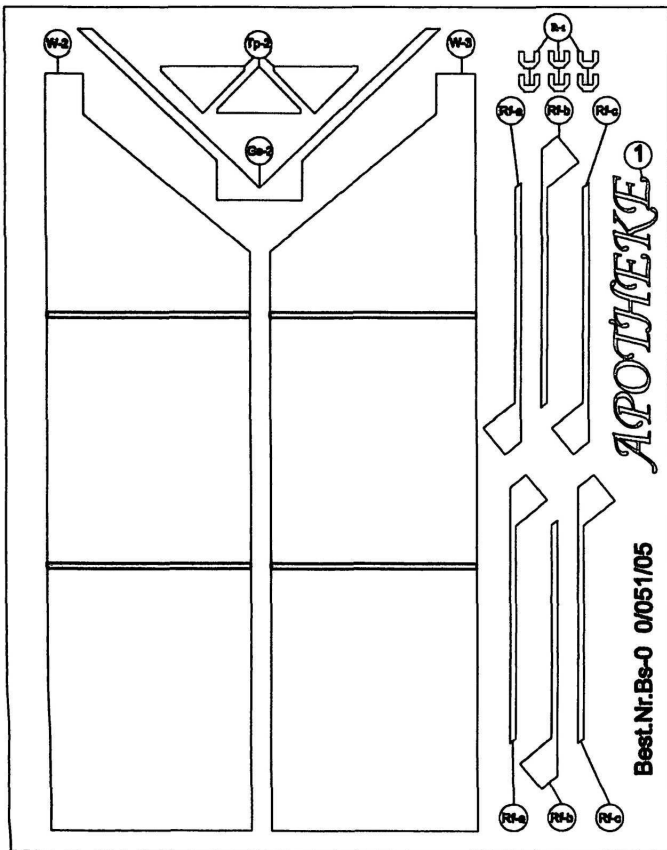

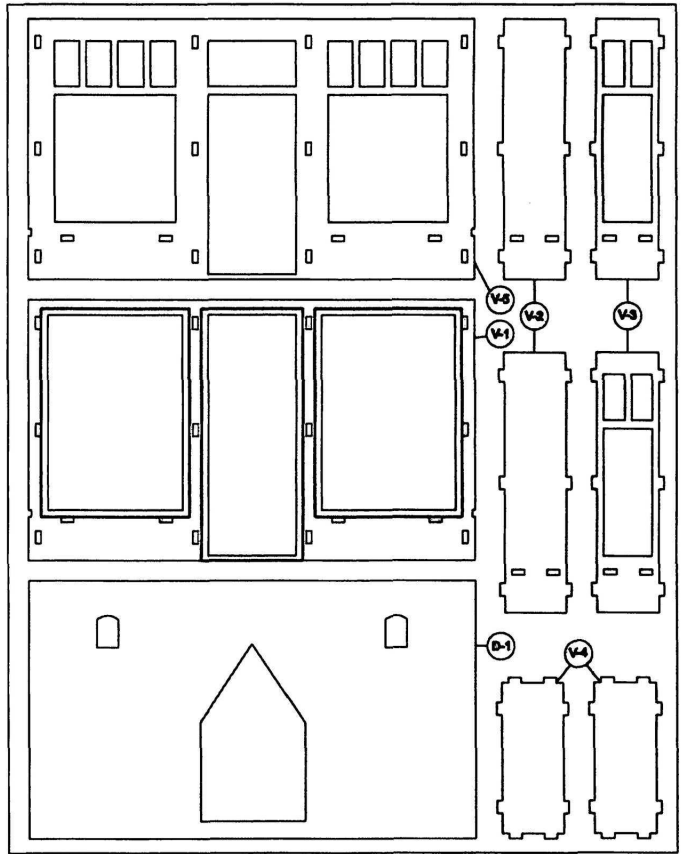

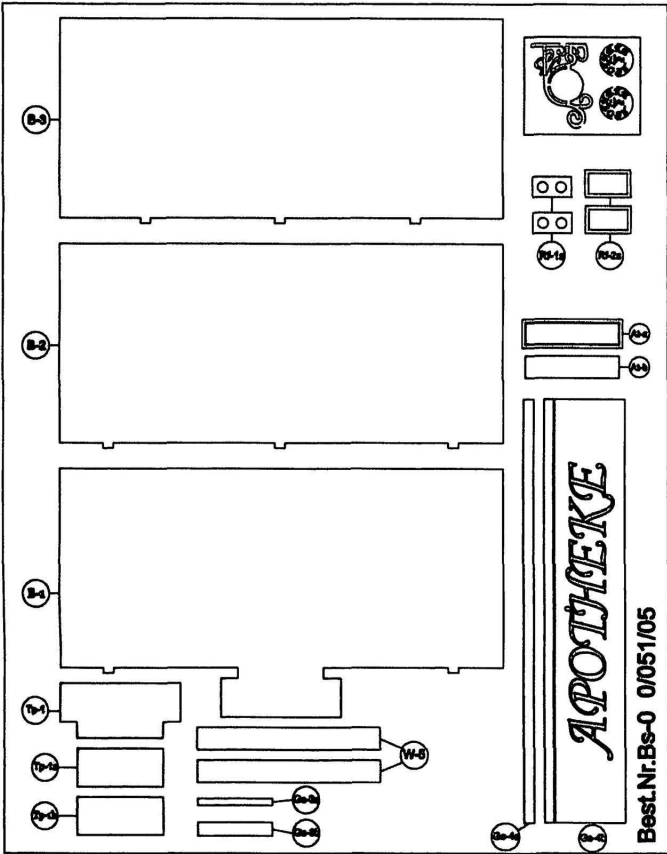

STANGEL Team.
