

Electric locomotive 460 100-1, SBB

7560050 | SBB

railway company: SBB

249,90€

Electric locomotive 460 100-1 of the Swiss Federal Railways.

- Named "Tösstal"
- Closed front apron included in the package
- Headlight/tail light switchable with a DIP switch

In 1992, the first Re 460 of the Swiss Federal Railways rolled out of the SLM and BBC factory halls in Oerlikon, Switzerland. The locomotive became known to the public as the "Lok 2000" and came to symbolise fast and modern passenger transport in Switzerland. Its striking and highly aerodynamic design, with a large front window, roof panelling, and distinctive beading along the side walls, makes the Re 460 an eye-catching rail vehicle.

General data

Coupling	NEM shaft 355 with close coupling mechanism
Minimum radius	192 mm
Flywheel	yes
Traction tyres	2
Number of driven axles	4
EAN	4005575263429
Scale	N
Epoch	VI
Railway Company	SBB

Electrical

Motor	3 pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Additional light function	yes
Control	DC Analog
Interface	Electrical interface for traction units according to NEM 651 standards with plug-in fixture

Measurements

Length over buffer	116 mm
