

Electric locomotive 372 007-5, CD Cargo

7560068 | **CD**

railway company: CD

179,90€

Photomontage

Electric locomotive 372 007-5 of the CD Cargo.

- Use in cross-border freight transport as far as Germany
- Rich detailing on the model with many separately applied plug-in parts
- Delicately designed roof with authentic pantographs

For continuous electric operation on the Dresden-Prague line, the Czechoslovakian State Railways (ČSD) procured a total of 35 multi-system locomotives in collaboration with the Deutsche Reichsbahn (DDR). These locomotives were designed to operate on both the 3 kV DC network of Czechoslovakia (CSSR) and the 15 kV AC network of the GDR. After testing a prototype, fourteen series units were put into service in 1991 and stationed at the locomotive depot in Decin.

When the freight division ČD Cargo was founded in 2007, nine of these locomotives were assigned to the new company. As the only ČD Cargo locomotives capable of operating on the German railway network until 2016, all of them were gradually modernised and repainted in the company's new colours.

Primarily used for transporting trains at the Decin/Bad Schandau border crossing (and continuing to Dresden and Leipzig), they are occasionally employed for domestic transport and also reach border stations in Poland.

General data

Coupling	NEM shaft 355 with close coupling mechanism
Minimum radius	192 mm
Traction tyres	2
Number of driven axles	4
EAN	9005033384760
Scale	N
Epoch	VI
Railway Company	CD

Electrical

Motor	5-pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Control	DC Analog
Interface	Electrical interface for traction units Next18

Measurements

Length over buffer	105 mm
