

2 piece set: Electric locomotives 151 094-0 and 151 117-9, DB

7560076 | 

railway company: DB

449,90€

Set of electric locomotives 151 094-0 and 151 117-9 of the Deutsche Bundesbahn.

- Both locomotives are fully equipped
- Separately applied plug-in parts
- With labeling for AK coupling
- Match the wagon set items 6660149 and 6660150

As the highlight of goods traffic, the class 151 locomotives hauled the heaviest ore trains in Western Europe from 1976, running between the North Sea ports and the Peine-Salzgitter steelworks, as well as to the Saarland. The trains reached loads of up to 5,700 tonnes. They operated exclusively in double traction and with automatic couplings, as conventional screw couplings would not have withstood the extremely high tractive forces.

General data

Coupling	In-house produced coupling
Minimum radius	192 mm
Flywheel	yes
Traction tyres	4
Number of driven axles	8
EAN	9005033387501
Scale	N
Epoch	IV
Railway Company	DB

Electrical

Motor	3 pole motor
Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.
LED head light	yes
Control	DC Analog
Interface	Electrical interface for traction units according to NEM 651 standards with plug-in fixture

Measurements

Length over buffer	244 mm
