

## Electric locomotive Re 465 008-1, BLS

7560083 | BLS

railway company: BLS

249,90€

Photomontage

Electric locomotive Re 465 008-1 belonging to the Swiss railway company BLS.

- Model with elaborate printing in "Golden Pass" design
- Closed front apron included

The Bern-Lötschberg-Simplon-Bahn (BLS) ordered an advancement of the general-purpose locomotive based on the SBB class 460 from the Swiss companies SLM Winterthur and ABB Zurich under class designation 465. In contrast to class 460, the locomotives not only have one frequency converter per bogie, but one frequency converter per axle. This allows the tractive force to be optimally applied to the rail. BLS uses the 18 locomotives mainly for freight traffic, but also in front of shuttle service trains.

## General data

Coupling	NEM shaft 355 with close coupling mechanism
Minimum radius	192 mm
Flywheel	yes
Traction tyres	2
Number of driven axles	4
EAN	9005033389413
Scale	N
Epoch	V-VI
Railway Company	BLS

## Electrical

Motor	3 pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Additional light function	yes
Control	DC Analog
Interface	Electrical interface for traction units according to NEM 651 standards with plug-in fixture

## Measurements

Length over buffer	116 mm
