

Electric locomotive 460 100-1, SBB

7570050 | SBB

railway company: SBB

349,90€

Electric locomotive 460 100-1 of the Swiss Federal Railways.

- Named "Tösstal"
- Closed front apron included in the package
- In digital operation with switchable headlight/tail light and driver's cab lighting

In 1992, the first Re 460 of the Swiss Federal Railways rolled out of the SLM and BBC factory halls in Oerlikon, Switzerland. The locomotive became known to the public as the "Lok 2000" and came to symbolise fast and modern passenger transport in Switzerland. Its striking and highly aerodynamic design, with a large front window, roof panelling, and distinctive beading along the side walls, makes the Re 460 an eye-catching rail vehicle.

General data

Coupling	NEM shaft 355 with close coupling mechanism
Minimum radius	192 mm
Flywheel	yes
Traction tyres	2
Number of driven axles	4
EAN	4005575263436
Scale	N
Epoch	VI
Railway Company	SBB

Electrical

Motor	3 pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Additional light function	yes
Decoder-Type	On-Board
Sound	yes
Interior lighting	Yes, LED, Digital switchable, Driver's cab lighting
Control	DC Digital
Digital decoder	On-Board

Measurements

Length over buffer

116 mm
