PRODUCT NEWS:

2015 Beilhack Snowblower US Version

!NOT JUST NEW PAINT!

Product Update:

Self propelled Beilhack snow blower.

Model with many digitally switchable functions:

Lifting and lowering of the snow cutter, rotating blower wheels, entire vehicle platform can be turned 180 degrees, LED lighting and sound equipment from factory.

BUT THERE IS STILL MORE:

The US Versions received US specific true-to-original changes to the model construction compared to European model:

- Body has been lengthened to match the US original (also additional vents added)
- At the back end, the vents and exhausts have been changed to match US original
- All lighting has been changed to the US original
- The hood and other elements in the front have been changed to match the US original
- Kaddy coupling has been added for the US modeler!

Start of production: calendar week 27
