

## Steam locomotive 50 1751, DB

7100046 | **DB**

railway company: DB

**379,90€**

Photomontage

Steam locomotive 50 1751 of the Deutsche Bundesbahn

Drive on two axles of the tender and via cardan shaft to all five driving axles of the locomotive.

- 4-dome boiler design without bell
- With small lamps on the front buffer beam
- Fine metal wheel sets and drive and coupling rods made of cast metal

Originally, the class 50 locomotives were equipped with a bell. During the implementation of safety compliance measures, the bell was removed. Later, due to boiler replacements and conversions, locomotives with lower numbers were also found to be without bells.

## General data

Coupling	NEM shaft 362 with close coupling mechanism at the tender
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	7
Number of axles with traction tyres	2
Article number	7100046
EAN	9005033385965
Scale	H0
Epoch	III
Railway Company	DB

## Electrical

Head light	Both sides of the vehicle are equipped with direction dependent triple headlights.
LED head light	yes
Control	DC Analog
Interface	Electrical interface for traction units PluX16

## Measurements

Length over buffer	265 mm
