railway company: K.Bay.Sts.B.

349,90€

Photomontage

Steam locomotive class Pt 2/3 of the Royal Bavarian State Railways.

- Detailed livery with fine decorative lines
- Movable Heusinger valve gear
- Ideal complement for the passenger coaches item 6200197

The Pt 2/3 type stood out among the light tender locomotives used for passenger service. Characteristic features included its slender boiler, the wide spacing between the leading axle and the coupled wheels (a remarkable 4000 mm!), and the relatively spacious driver's cab. A door at the rear of the locomotive also allowed the fireman to enter the train to assume the conductor's duties when needed.

The Bavarian State Railway put the first locomotives into service in 1909, the last in 1916. All locomotives (type 1 B h2, maximum speed 65 km/h) were supplied by Krauss in Munich.

General data

Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	2
Article number	7110037
EAN	9005033383961
Scale	H0
Epoch	I
Railway Company	K.Bay.Sts.B.

Electrical

Head light	Direction dependent dual headlights
Sound	yes
Control	DC Digital
Interface	Electrical interface for traction units according to NEM 651 standards with plug-in fixture
Digital decoder	NEM 651

Measurements

Length over buffer	107 mm
