Photomontage

Steam locomotive 5605 (DRB class 52) of the Luxembourg State Railways.

Drive on two axles of the tender and via a cardan shaft on all five driving axles of the locomotive.

- With fine metal-spoked wheels
- Driving and coupling rods made of precision-cast metal
- With delicate lettering
- Z21 driver's cab available

To meet the urgent need for modern steam locomotives, the Luxembourg State Railways acquired KDL 1 class engines (DRB class 52), which were available fairly quickly. These were mainly used to manage traffic on the Northern line until 1961.

The model will be implemented based on the current 52 series without any changes.
