railway company: DB

149,90€

Photomontage

Diesel locomotive 211 043 of the Deutsche Bundesbahn.

- Version with ivory-coloured grab rails
- Finely detailed model with many separately applied plug-in parts
- Unobstructed view through the driver's cab
- Push-pull train control cable for self-assembly included

After testing the pre-series units, the V 100.10 class was procured in series in 1961/62. It was used in mixed traffic on non-electrified branch lines and for light duties on main lines. With an output of 1,100 hp (810 kW), it was approved for speeds of up to 110 km/h. In 1968, the locomotives were redesignated as Class 211. Following the classic red livery, many units received the ocean blue/beige colour scheme from 1974/75 onwards. Units 211 008 to 063 were equipped with push-pull train control.

General data

Coupling	NEM shaft 362 without close coupling mechanism
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	4
Number of axles with traction tyres	1
Article number	7300098
EAN	9005033388218
Scale	H0
Epoch	IV
Railway Company	DB

Electrical

Motor	5-pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Control	DC Analog
Interface	Electrical interface for traction units PluX22

Measurements

Length over buffer	139 mm
