

Diesel locomotive 234 399-4, DB AG

7310094 | **DB-AG**

railway company: DB-AG

274,90€

Photmontage

Diesel locomotive 234 399 of the Deutsche Bahn.

- Variant in DR livery with DB AG logo
- Operating condition: 1994 to 1998
- Reliable, high-tractive effort model for the formation of authentic long trains
- In digital operation with switchable shunting light and switchable headlight/tail light

The 132 series locomotives (232, 233, 234 and 241) were imported from the Voroshilovgrad locomotive factory in the Soviet Union to the GDR in 1970 and put into service by the Deutsche Reichsbahn.

Following the decline in goods traffic after reunification, a significant number of diesel locomotives were identified as surplus to requirements. The class 132 locomotives (BR 232 since 1 January 1992) were gradually converted to the new class 234, using the 140 km/h bogies from the decommissioned class 130. From 1994 onwards, they were used in IR and IC services.

General data

Coupling	NEM shaft 362 without close coupling mechanism
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	6
Number of axles with traction tyres	2
Article number	7310094
EAN	9005033386498
Scale	H0
Epoch	IV-VI
Railway Company	DB-AG

Electrical

Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Additional light function	yes
Sound	yes
Control	DC Digital
Interface	Electrical interface for traction units PluX22
Digital decoder	PluX16

Measurements

Length over buffer	237 mm
