railway company: EINSTELLER

329,90€

Photomontage

Diesel locomotive 2143 062 of the Regiobahn.

New design!

- Version of the 3rd series with a straight frame
- Regiobahn design
- Free-standing grab rails, some made of metal
- In digital operation with switchable high beam, headlight/tail light and driver's cab lighting

A large part of the 2143 class locomotive stock consisted of the third production series, which was further divided into subclasses. The so-called 3a class included running numbers 2143.34 – 43, while the 3b class covered 2143.44 – 70. All engines in the third series share several common features: the frame has a straight design and, unlike the first series, is not cranked. The areas around the driver's cab doors have long rain gutters, and the door windows are framed in metal. Likewise, the fuel filling sections were redesigned with different dimensions. After being taken out of service, many locomotives were sold to private railways in Germany and abroad. Some vehicles are now assigned to museum duty, while others remain in loyal service in the infrastructure sector.

General data

Coupling	NEM shaft 362 with close coupling mechanism
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	2
Number of axles with traction tyres	1
Article number	7320093
EAN	9005033385439
Scale	H0
Epoch	VI
Railway Company	EINSTELLER

Electrical

Motor	5-pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Additional light function	yes
Sound	yes
Interior lighting	Yes, LED, Digital switchable, Driver's cab lighting
Control	AC
Interface	Electrical interface for traction units PluX22
Digital decoder	PluX22

Measurements

Length over buffer

181 mm
