Photomontage

Diesel locomotive 211 043 of the Deutsche Bundesbahn.

- Version with ivory-coloured grab rails
- Finely detailed model with many separately applied plug-in parts
- Unobstructed view through the driver's cab
- Push-pull train control cable for self-assembly included
- In digital mode with switchable high beam and switchable headlight/tail light

After testing the pre-series units, the V 100.10 class was procured in series in 1961/62. It was used in mixed traffic on non-electrified branch lines and for light duties on main lines. With an output of 1,100 hp (810 kW), it was approved for speeds of up to 110 km/h. In 1968, the locomotives were redesignated as Class 211. Following the classic red livery, many units received the ocean blue/beige colour scheme from 1974/75 onwards. Units 211 008 to 063 were equipped with push-pull train control.

General data

Coupling	NEM shaft 362 without close coupling mechanism
Minimum radius	358 mm
Flywheel	yes
Number of driven axles	2
Number of axles with traction tyres	2
Article number	7320098
EAN	9005033388232
Scale	H0
Epoch	IV
Railway Company	DB

Electrical

Motor	5-pole motor
Head light	3 headlight, dependent on the direction of travel/2 tail lights, dependent on the direction of travel
LED head light	yes
Additional light function	yes
Sound	yes
Control	AC
Interface	Electrical interface for traction units PluX22
Digital decoder	PluX22

Measurements

Length over buffer

139 mm
